

ShipOptimizer™

Shipping Containerization Solution

Key Benefits

- ◆ Reduces Shipping Costs.
- ◆ Reduces Packing Costs
- ◆ Boosts Productivity
- ◆ Improves Container Fill Rate
- ◆ Reduces Shipping Errors
- ◆ Automates Container Selection

Overview

ShipOptimizer is a revolutionary new way for companies to offset rising transportation costs and improve efficiency within their warehouse. Simply stated, ShipOptimizer gives companies the ability to accurately predict shipping costs whether orders are taken via the internet or at order entry time, in advance of actually shipping the product.

Key Features

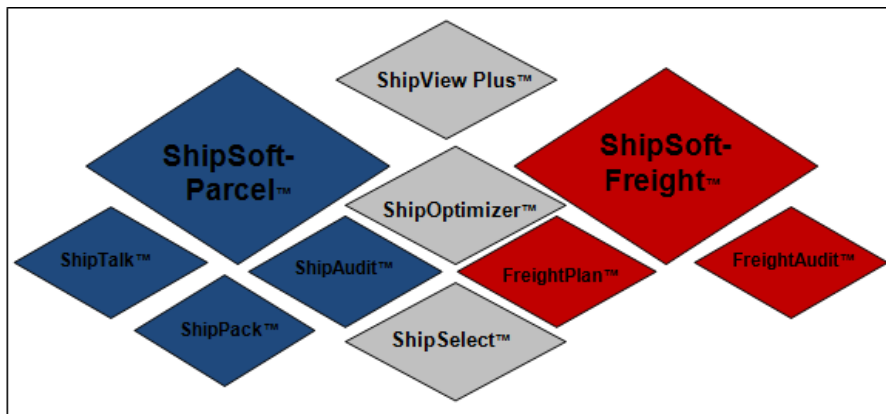

- ◆ The ability to optimize the container packing process in your warehouse enables companies to face increasingly complicated processing requirements in the fulfillment and distribution of their products.
- ◆ The ability to address changes in order profiles and full-case and split-case picking, and build rules surrounding carton and pallet build.
- ◆ The ability to develop an efficient plan to build cartons, pallets, and trailers as part of distribution processes.
- ◆ The ability to select the number and size of cartons needed to pack orders for shipment based on each item's dimensional cube, weight and compatibility with other items.
- ◆ The ability to meet complex processing requirements, save time, packing materials and containers, and reduce operating and transportation costs as well as product damage that leads to costly returns.

Software and Hardware Requirements

- ◆ IBM System i
- ◆ OS/400 - V5R4 or later
- ◆ Varsity ShipSoft v 2.7 or higher

Advantages

- ◆ It allows you to quote freight at the time an order is placed.
- ◆ It allows you to take orders in a Web Shopping cart and quote real shipping cost.
- ◆ It allows you to save money on your shipping cost.
- ◆ It allows the ordering experience to be a better experience for your customer.
- ◆ It allows you to streamline processing within your warehouse.
