

ShipTalk™ AES

Automated Export System

Key Benefits

- ◆ Compliance: Ensures US export compliance *before* shipment
- ◆ Saves time: Does away with the extra steps of preparing and handling the paper SED
- ◆ Reduces costs: Enhances the automation of your international shipping processes
- ◆ Minimizes risks: Eliminates the penalties and fines associated with incorrect or delayed filing
- ◆ Accelerates the order to cash cycle: Eliminates delays in shipment due to incorrect or missing data

Overview

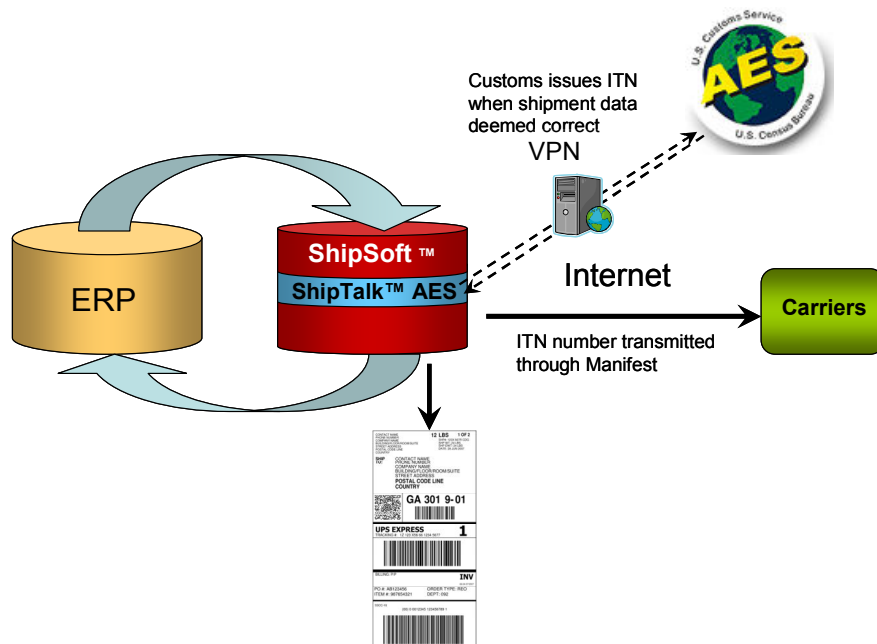

Varsity ShipTalk™ AES allows exporting companies to file electronic export documents directly with US Customs and Border Protection (CBP). Appropriate for customers who have a large or growing export volume, want to fully automate their exporting process, or export goods on the Commerce Control List (CCL) and/or the United States Munitions List (USML), ShipTalk AES eliminates the manual creation and reporting of export information. It also ensures US export compliance before shipment occurs. Be ready when the electronic filing of shipping documents becomes mandatory.

Key Features

- ◆ Automatically prompts user for all the necessary information.
- ◆ Automatically and electronically files the required export shipment data with US Customs.
- ◆ Provides AES filing support natively from within the Varsity ShipSoft™ Application. This eliminates the need to print Shipper Export Declarations (SEDs) or manually enter the information into stand-alone AES filing systems like AES Direct.
- ◆ AES Software Certified.

Software and Hardware Requirements

- ◆ An AS/400 (iSeries/400/i5) running OS/400 version V5R1 or later
- ◆ Varsity ShipSoft Version 2.62 or higher
- ◆ A Windows PC networked to the iSeries/400 with network and Internet access
- ◆ MQ Series and Cisco VPN clients running on your PC (provided by US Customs/Census Bureau)
