

Freight Shipping with Varsity

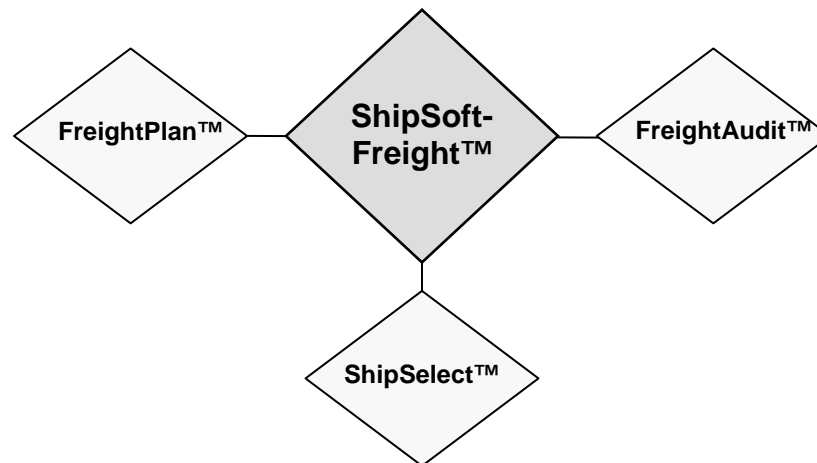

Key Benefits

- ◆ Flexible, modular solution allows freight shippers to select only the functionality they require
- ◆ Reduces labor by applying business rules to custom tariffs and shipment information for optimal carrier and mode selection
- ◆ Shrinks overall shipping expenses through automation of the freight audit process
- ◆ Guaranteed upgrade path provides scalability for growing businesses

Overview

Varsity offers powerful freight shipping solutions for LTL, truckload, and rail shipments within North America. Exclusively designed for the IBM System i, Varsity's freight solutions automate the complicated tasks of load tendering, LTL rating, shipment planning, carrier selection, mode selection, shipment documentation and confirmation, and even freight auditing and payment.

Varsity's freight solutions combine for an integrated suite of advanced supply chain execution modules for the most complex freight shipping and auditing requirements.

Varsity's Supply Chain Execution Modules for Freight

ShipSoft-Freight

ShipSoft-Freight is a multi-modal rating engine and shipping solution for freight shippers who ship within North America. It simplifies the outbound shipping process for LTL, truckload, and rail shipments because it provides one platform for all shipments and selects the optimal rate, carrier, and mode. It also supports the generation of Bills of Lading (including VICs), LTL labels, and LTL manifesting.

FreightPlan

FreightPlan automates the pre-shipment load planning process for inbound and outbound freight. FreightPlan enables ShipSoft-Freight users to do dynamic load building and order consolidation, produce recommended shipping plans, and perform online review and acceptance of load plans. Working with user-defined parameters, FreightPlan incorporates customer delivery requirements to reduce transportation costs, support customer service standards, and enhance productivity. It also ensures the most effective route is chosen to deliver shipments as efficiently as possible.

FreightAudit

FreightAudit is a carrier invoice auditing and payment solution for ShipSoft-Freight users. FreightAudit provides automatic freight bill processing and audit capabilities for LTL, truckload, and rail shipments. It audits hard copy and EDI freight bills from carriers, enables self-invoicing, supports freight cost allocation and accrual reporting, and provides historical reporting.

ShipSelect

ShipSelect is a complex carrier selection tool that goes beyond the traditional lowest cost or fastest delivery criteria. ShipSelect evaluates carrier options and selects the optimal carrier for each shipment based on user-defined, weighted criteria such as cost, preference, transit time, past performance, mode selection, and service type.
