 OEVKDET Lines
 OEVKPRC Pricing
 OEVKTOT Totals

Pick List / Packing Details
 WHSPSLP Pick Header
 WHSPSLC Cartons
 WHSPSLD Contents
 WHSSHGP Manifest

Seamless Order Management and Shipping

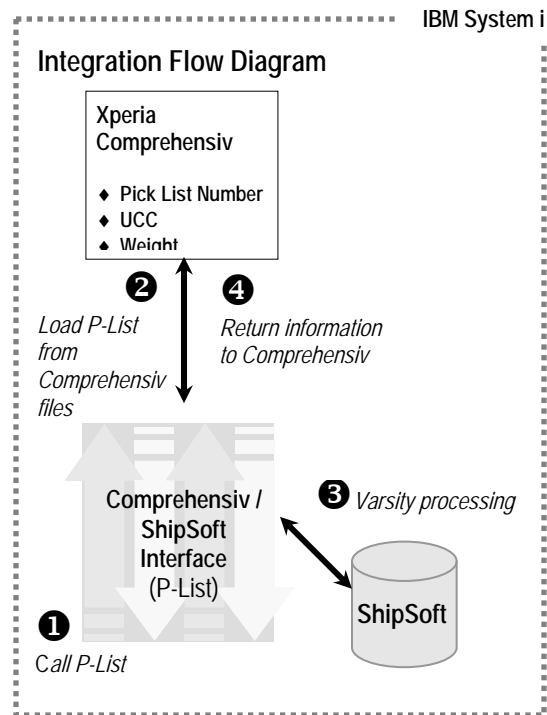

By tightly integrating Xperia Comprehensive with Varsity solutions on the IBM System i, the Xperia Comprehensive interface enables seamless order processing from order entry through delivery. Shipment and order information is shared across the organization enabling:

- ◆ Rate shopping, selection of shipping options, and quotation of shipping rates at order entry
- ◆ Instant visibility to shipment status and simplified requests for proof of delivery
- ◆ Accurate shipping costs for invoicing and analysis

Adaptable Technology

The Xperia Comprehensiv interface uses order header and detail files to lead the front end selection screen that initiate and drive the shipping process and file updates. The primary Xperia Comprehensiv files used for the interface *are listed on the left*. Varsity pulls required shipment data such as the pick number, quantity, and ship-to address directly from the Xperia Comprehensive database, processes the shipments, and updates the Xperia Comprehensive database with shipping details including tracking number, package ID, weight, and freight charges. Designed for flexibility, this data exchange method can be tailored to support virtually any supply chain process.

The Xperia Comprehensiv interface allows "invisible" processing of orders, without requiring additional user input of screens, or by "visible" mode, where Varsity screens are populated with Xperia Comprehensiv data and displayed to allow the shipper to modify/confirm the shipping details prior to processing the shipment with Varsity solutions.

The Varsity and Comprehensiv systems both reside on the IBM System i platform, resulting in superior speed, throughput and reliability.

Commitment to Customer Satisfaction

Varsity works directly with Xperia to maintain compliance with the latest versions of Xperia Comprehensive. By working together, Xperia and Varsity ensure their joint customers have reliable integration today, as well as support for future enhancements.

This interface brief represents a typical Comprehensiv deployment. Since Varsity supports a wide range of shipper requirements, the supported files, structures, and interface processes may vary based on the Comprehensiv version or custom software modifications.
